

"Smart Belay" guarantee the best security to you!

In the new forest rope park, the adventure and amusement park Pitztal, we only use the new system "Smart Belay" of Edelrid.

Two role carabiners communicate with each other: If one carabine is open, the opening mechanism of the second one is blocked, until the first carabine is mounted and locked into the security rope.

**"An accidental hang out of both carabines
is nearly impossible"**
